AQUAZONE
QUALITY PLUMBING SOLUTIONS

Cleaning

To keep the material's appearance as long as possible, a few guidelines must be followed.

Cleaning metal parts: water contains calcium that deposits on surfaces and forms unpleasant spots. For routine cleaning, simply use a damp cloth with a little soap, rinse and dry.

Important note: Never use abrasive detergents or disinfectants or those containing alcohol, hydrochloric acid or phosphoric acid.

Guarantee

The product is guaranteed for 1 Year against any manufacturing defects. Guarantee is void if incorrect use or improper installation or careless treatment and cleaning. Aquazone will not be responsible for any labour and installation costs and/or direct or indirect damages suffered or arisen during the installation, maintenance or replacement of the product. Correct Use

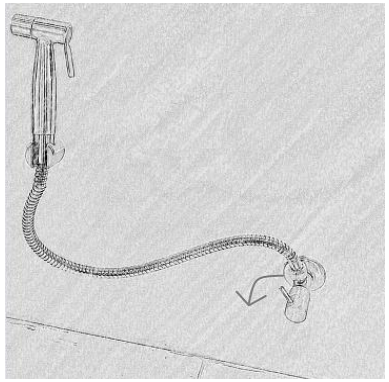

Image 1- Open the Angle Valve

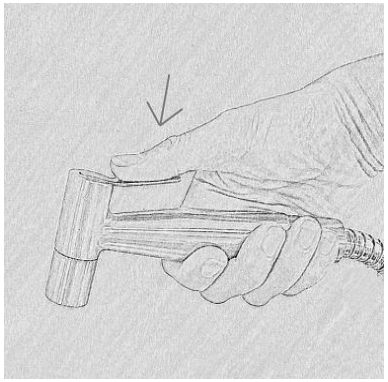

Image 2 -The Hand spray operates by lightly pressing the head lever

AQUAZONE
QUALITY PLUMBING SOLUTIONS

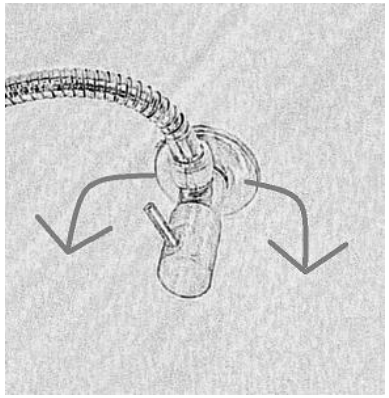

Image 3 - It is important to always turn off the angle valve after use

Hang the hand spray in the wall bracket

INCORRECT USE - NEVER CONNECT THE HOSE TO A WATER SUPPLY WITHOUT AN ANGLE VALVE, STOP VALVE OR MIXER

To operate the hand spray, open the angle valve (Image 1) the hand spray can then be activated by pressing the head lever (Image 2). It is important to always turn-off the angle valve after use (Image 3). The hand spray should not be considered as a permanent water stop.

RECOMMENDED OPERATING PRESSURE – 0.2 TO 5 BAR
