

# BYSTRO

## STAINLESS STEEL

---

To ensure your BYSTRO product performs and gives many years of use, please follow these recommendations carefully, as any damages resulting from poor maintenance are not covered under the warranty.

The product can be cleaned with warm water, a mild soap and a clean soft cloth.

Ensure to clean in the direction of the grain.

It is not required to use any abrasive cleaning pads, wire wool or micro-fibre cloths to clean the product. Avoid a vigorous cleaning action.

Abrasive or strong cleaning products containing ammonia, bleaches, alcohol, dyes, acids (hydrochloric, formic, phosphorus, chlorine or acetic) will be detrimental to the product finish.

If using a spray cleaner, apply the cleaning agent onto the soft cloth, never directly spray onto the product as the cleaner may enter gaps and openings and cause damage.

Do not leave carbon steel items in contact with stainless-steel, especially if wet.

If a specialized cleaner is required, always follow the instructions provided on the cleaning product, this would include application and dosage.

Always test the cleaning agent on an inconspicuous area before applying to the whole surface, do not allow the cleaner to remain on the product for a period of time. After cleaning, rinse thoroughly with clean water.

We would not recommend the mixing of different cleaning agents.

Stainless-steel may discolour if left in contact with salts or acids for extended periods.

After cleaning, dry with a soft cloth.
