

USER GUIDE

Thank you for buying this solar light from LES JARDINS® SOLAR LIGHTING

SOLAR MODULE 300 LUMENS (2 MODES)

First short click on the ON/OFF button

MODE 1 - (Visualized by one flash) :

- Automatically starts at night fall, automatic shutdown at sunrise (80 lumens preset to optimize light supply over the year)

Second short click on the ON/OFF button

MODE 2 - (Visualized by 2 flashes) :

- Forced ON Mode (stays on day or night at max power 300 Lumens).

Third short click on the ON/OFF button = OFF

OFF - (no flash).

In order to find a mode, follow the cycle MODE 1 / MODE 2 / OFF

⚠ If your module does not turn on : Place it under the sun for a day.

CUSTOM SETTINGS OF THE LIGHT INTENSITY ADJUSTED BY LONG PRESSES OF THE ON/OFF BUTTON :

- **MODE 1** : Setting of the standby light intensity from 3 to 300 lumens.
- **MODE 2** : Setting of the permanent light intensity from 3 to 300 lumens.

Working time : from 4h to 150h depending on custom settings of the light intensity.

TIPS FOR OPTIMAL PERFORMANCE

Position your lamp in a spot preferably exposed to the sun.

Clean the solar panel regularly for best results.

Do not keep the solar module at low battery charge for a long period of time. It should be fully charged at least once a year.

Dim the light down in winter, since it might not fully recharge in a day, in order to keep it on all night.

BATTERY REPLACEMENT

DO NOT REPLACE THE BATTERY BY YOURSELF. IT WILL VOID THE WARRANTY.

If your light does not work after a solar or USB charge, the battery should be replaced.

Our lithium battery has a life expectancy of 3 to 5 years.

It is highly recommended to use the original battery, supplied by LES JARDINS (otherwise the warranty will be voided).

Please recycle the old battery.

CHARGING MODES

Solar charge: 8 hours in optimal conditions

While charging, 3 short blinks every 10 seconds show that the battery is 75% full or above.

TECHNICAL FEATURES

Your solar light is equipped with an interchangeable solar module that combines a high-performance solar panel, 1 lithium battery, 5 high efficiency LED (2W-3000K) generating 300 lumens. It also comes with a grey on/off button that allows you to select one of the two operation modes and/or dim the light.

WARRANTY

This product is warranted against manufacturer defects for 1 year. In case of claim, the code on the side of the solar module should be legible. Warranty does not cover misuse or intentional damages.

Such as but not limited to:

A fall generating visible scratches or invisible electronic damages inside the module.

Total immersion

Wrong battery brand or installation.

Purchased more than 1 year ago.
