

CHROME & SPECIAL FINISHES

To ensure your BAGNODESIGN & AQUAZONE product performs and gives many years of use, please follow these recommendations carefully, as any damages resulting from poor maintenance are not covered under the warranty.

The product can be cleaned with warm water, a mild soap and a clean soft cloth.

Clean progressively and gently.

It is not required to use any abrasive cleaning pads, wire wool or micro-fibre cloths to clean the product. Avoid a vigorous cleaning action, as this could contribute to denaturing and dulling the finish.

Abrasive or strong cleaning products containing ammonia, bleaches, alcohol, dyes, acids (hydrochloric, formic, phosphorus, chlorine or acetic) will be detrimental to the product finish.

If using a spray cleaner, apply the cleaning agent onto a soft cloth, never directly spray onto the product as the cleaner may enter gaps and openings and cause damage. Do not allow the cleaner to remain on the product for a period of time. After cleaning, rinse thoroughly with clean water.

If limescale has built up on your product do not attempt to chip this off as this could damage the protective lacquer and lead to further damage. Several applications of lemon juice (not a concentrate) or white vinegar, followed by a thorough rinsing with clean water will slowly help to remove it. After cleaning, dry with a soft cloth.
