

WHIRLPOOL SYSTEMS

What to do?...

Fill the bath with hot water with a minimum temperature of 35 °C.

Pour approx. 330ml (1/3 of the bottle) of whirlpool cleaner into the water (mixture proportion 330ml per 200l of water)

Operate the whirlpool system for 5 minutes.

Stop the Whirlpool and let it rest for 2 hours.

Operate the whirlpool system for a further 5 minutes.

Empty the bath and thoroughly rinse with water.

Whirlpool System Cleaner

What else to consider?...

Flush your Whirlpool once per month.

Never use the bath whilst the cleaning solution is applied.
