IMPORTANT PLEASE READ

All products manufactured and supplied by BAGNODESIGN are fit for purpose as long as they are installed, used correctly, cleaned and receive regular maintenance in accordance with these instructions...

Remove all packaging and check the product for damage or missing parts before commencing with the installation.

Any alterations made to this product and its components may infringe product certification, infringe water regulations and invalidate the guarantee. The Installation must comply with all local/national water supply authority regulations/bylaws and building and plumbing regulations, therefore we strongly recommend that your product be installed by a reputable qualified trade's person.

PRODUCT LIFECYCLE

"The product LiveCyclele is the collective stages that a product goes through from its conception and design through to its ultimate disposal."

DISPOSAL GUIDANCE

The best way to ensure your Product has a long life is to follow the Care and Maintenance guides set by the Manufacture after purchase. This document can be found at www.sanipexgroup.com.

The life cycle of the product is not in correlation to the product Guarantee; the standards the products are manufactured or certified to (e.g. CE & WRAS) can exceed past the Guarantee duration. After the life cycle of the product is deemed complete by the end-user please follow the below to dispose of the items correctly...

Mixers (Taps):

If the mixers are no longer accepted due to mechanical use or aesthetic style, these can be disposed of at a registered Local Authority waste recycling center where the individual components can be sorted.

CLEANING CARE GUIDE

Only use a mild soap and water for cleaning.

Rinse with water to remove the mild soap solution.

We recommend the product is dried using a soft cloth after every use.

Never use any abrasive or strong cleaning products containing, bleaches, acids (hydrochloric, formic, phosphorus, chlorine or acetic), strong detergents, limescale remover, alcohol or dyes etc.

Never use abrasive cleaning pads, wire wool or microfibre cloths.

Never use cleaning equipment that may have been pre-used and contaminated with the above substances.

Never apply the cleaning product directly onto the finished surface.

Assemble the part as per the above. Ensure that the mains water supply is off before installation. Install the mixer housing (1) at a depth so that the finished surface is between the Min/Max distance in the drawing.

Connect the Hot and Cold water supplies to the mixer*, then install the mixed water connections for the spout*. Cap off and pressure test to prevent any future leakage. Once the surrounding finishes have been applied (tiles/marble etc.) remove the front covers (2). Fit the face plate (3) onto the mixer body. Slide the handle (4) on to the cartridge pin and secure with the grub screw (5), then push on the cap (6). Open the water supplies and test. Fix the support for the spout (7) using teflon or hemp; fix the spout (8) on the support using the grub screw (9).

* Before making any inlet pipe connections, all supply pipes **MUST** be thoroughly flushed to remove debris. Failure to do this could result in damage to the cartridge and components or low flow from the mixer.
