General Installation Guide

MODELS COVERED:
ROUND MIRROR
ILLUMINATED LED ROUND MIRROR

Please leave these instructions with the customer

IMPORTANT PLEASE READ

All products manufactured and supplied by BAGNODESIGN are fit for purpose as long as they are Installed, used correctly, cleaned and receive regular maintenance in accordance with these instructions...

Remove all packaging and check the product for damage or missing parts before commencing with the installation.

Any alterations made to this product and its components may infringe product certification, infringe water regulations and invalidate the guarantee. The Installation must comply with all local/national water supply authority regulations/byelaws and building and plumbing regulations, therefore we strongly recommend that your product be installed by a reputable qualified trade's person.

PRODUCT LIFECYCLE

"The product lifecycle is the collective stages that a product goes through from its conception and design through to its ultimate disposal."

DISPOSAL GUIDANCE

The best way to ensure your Product has a long life is to follow the Care and Maintenance guides set by the Manufacture after purchase. This document can be found at www.bagnodesignlondon.com. The lifecycle of the product is not in correlation to the product Guarantee; the standards the products are manufactured or certified to (e.g. CE & WRAS) can exceed past the Guarantee duration. After the lifecycle of the product is deemed complete by the end-user please follow the below to dispose of the items correctly...

CLEANING CARE GUIDE

All products are designed for normal use in bathrooms

Only use a mild soap and water for cleaning.

Rinse with water to remove the mild soap solution.

We recommend the product is dried using a soft cloth after every use.

Never use excessive amounts of water for cleaning, failure to do so could affect the warranty.

Never leave water lying on the surface of product.

Never use any abrasive or strong cleaning products containing, bleaches, acids (hydrochloric, formic, phosphorus, chlorine or acetic), strong detergents, limescale remover, alcohol or dyes etc.

Never use abrasive cleaning pads, wire wool or microfibre cloths.

Never use cleaning equipment that may have been pre-used and contaminated with the above substances.

Never apply the cleaning product directly onto the finished surface.

GENERAL INSTALLATION:

To the installer, please read and follow these instructions carefully, as the guarantee is only valid if the product is installed as directed.

Don't rush, read the instructions first and run through them before you begin, keep the fittings together to avoid loss, do not overtighten screws or bolts.

If the product is covered with polythene protective film, do not remove until the installation is complete to grant maximum protection. However, remove film where any two surfaces will be in permanent contact. If tools are required to be used on a 'finished' surface, please place a cloth or similar over the area to protect the item from unnecessary scratching.

Verify that the dimensions on the plan are the same as the ones of the product.

Please note this product can require 2 or more persons to lift and manoeuvre into position.

In some cases, where the multiple products are combined all products must still be considered individual and should be installed individually.

Additional products may be required for the installation, please check the Technical data sheet or current Price guide for information.

TOOLS REQUIRED (Not Supplied)

Drill and Drill bits:

Required when securing the bracket to the wall. Use an appropriate size bit to match the wall fixing chosen (screws and fixings may not be supplied with the product).

- * Screwdriver
- * Electrical Screwdriver
- * Tape measure
- * Pencil
- * Spirit Level
- * Hammer

ELECTRICAL CONNECTIONS

All electrical connections and alterations should be carried out by a qualified electrician and be in accordance with Part P regulations.

All **BAGNODESIGN** mirrors are IP rated to different standards and are suitable for installation in various zones. The diagram below illustrates this zonal concept and must be followed to ensure safe installation of electrical bathroom products.

The diagrams and information below are a guide to Bathroom Zones as referred to in IP ratings it is important to install an electrical product in the correct bathroom zone i.e. the zone referred to in the IP rating of the product. This is not an installation guide, and reference should be made to the latest edition of the IEE wirings Regulations or a qualified electrician.

Zone 0 is inside the bath or shower tray itself. Any appliance used in this zone must be rated at least IP67 which is total immersion proof.

Zone 1 is the area above the bath or shower tray to a height of 2.25m from the floor. In this zone a minimum rating of IP44 is required and products must also be protected by a 30mA residual current device (RCD) to protect the circuit. The electrical connection to the power supply for these products must be in Zones 2/3 of the bathroom in compliance with BS7671:2001 - IEE Wiring Regulations.

Zone 2 is an area stretching 0.6m outside the perimeter of the bath and to a height of 2.25m from the floor. In this zone an IP rating of at least IP44 is required. In addition, it is good practice to consider the area around a washbasin, within a 60cm radius of any tap to be considered as zone 2.

ROUND MIRROR
ILLUMINATED LED ROUND MIRROR

Measure the distance between the brackets on the rear-side of the mirror, Calculate this distance into the final position of where the mirror will be hung, and mark the 2 points on the wall.

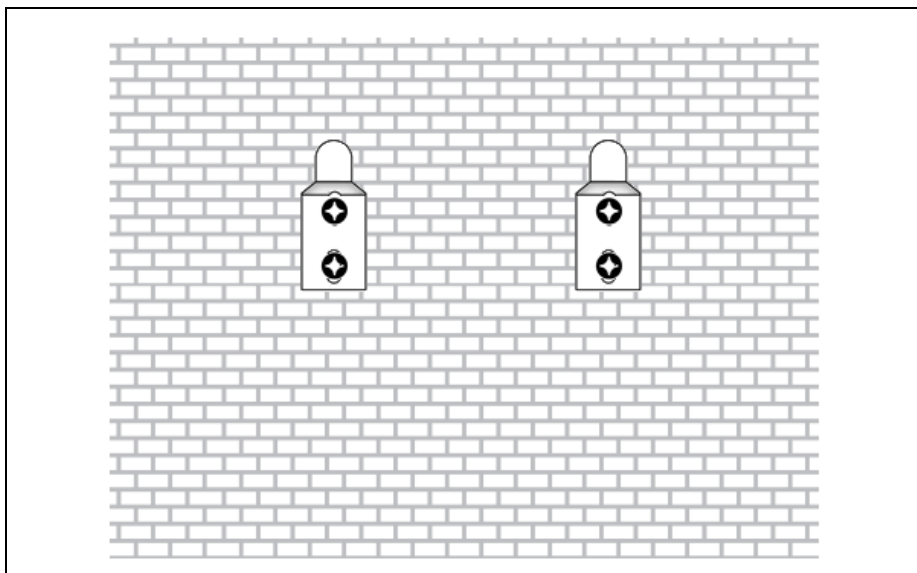

Drill the two marks to the depth of plug that will be used.

ROUND MIRROR
ILLUMINATED LED ROUND MIRROR

Insert the plugs into the wall, if slightly tight, tap in with a hammer.

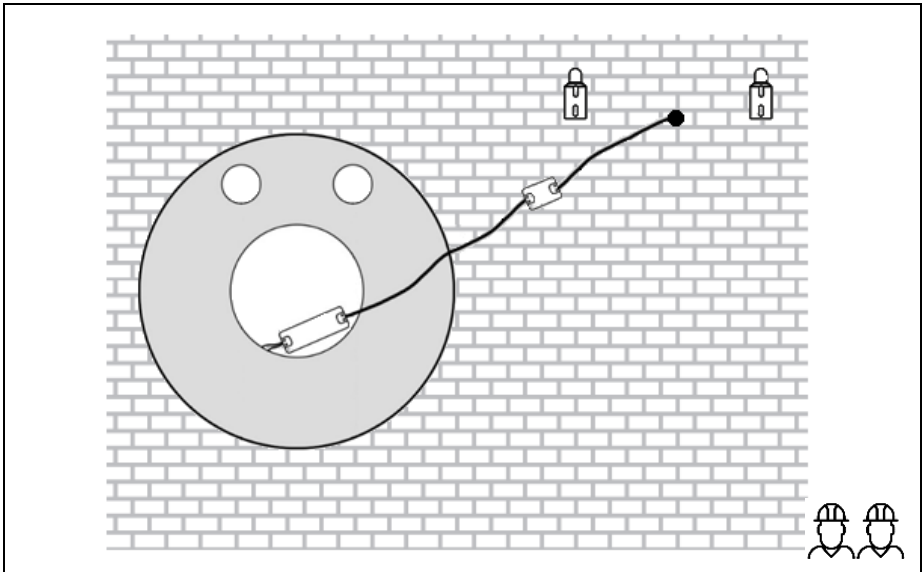

Screw the brackets to the wall.

**The round mirror can now be installed onto the brackets place the mirror above the brackets, then slowly slide down.

ROUND MIRROR
ILLUMINATED LED ROUND MIRROR

Allow plenty of wire flex from the wall to a place where the mirror can comfortably sit, connect the live and neutral wires into a suitable junction/mains connection block.

2 persons may be required to hang the mirror, place the mirror above the brackets, then slowly slide down, the mirror can be slightly pivoted to allow vision of the brackets. Ensure the wire isn't caught or kinked as its hung.
