

Kit di fissaggio

FASE N.1

Procedere con l'inserimento del copriaso sul sanitario.
Far passare la vite con la levetta Horizon ed il dado fino a che la basetta regolabile "Particolare A" non appoggia completamente sulla ceramica.
Avvitare il fissaggio "Particolare A" sul vaso in prossimità dei fori con lo stesso sempre in trazione.

FASE N.2

Inserire il pin del fissaggio nel foro della cerniera.

FASE N.3

Abbassare il copriwater e centrarlo sul sanitario.

FASE N.4

Serrare la vite con il cacciavite e con la chiave in dotazione.
Successivamente rimuovere il copriwater dal fissaggio.

FASE N.5

Inserire la borchietta di copertura sul fissaggio.

FASE N.6

Inserire il copriwater sul pin di fissaggio e posizionare la piastrina che si trova nella cerniera sul pin. (Vedi immagine sopra).
In questo modo la cerniera è stata bloccata e non potrà sganciarsi.

FASE N.7

Copriwater installato correttamente.

Fixing Kit / Kit de fijación

FASE N.1

Place the seat-cover onto the sanitaryware. Let the screw fixing go through with the Horizon lever and the nut until the adjustable terminal board "detail A" inserts completely on the pan. Screw the fixing "detail A" on the pan next to the holes always keeping it level.

Proceda con la instalación de la tapa sobre el sanitario. Hacer pasar el tornillo con la leva horizontal y la tuerca hasta que la base regulable apoye completamente sobre la cerámica. Atornillar la fijación "part.A" levemente, aproximando esta al inodoro al mismo tiempo que ejercemos una tracción hacia arriba de dicha fijación.

FASE N.2

Insert the fixing pin into the hinge holes.
Insertar el pivote de la fijación en el orificio de la bisagra.

FASE N.3

Lower the seat-cover and centerize onto the sanitaryware.
Bajar la tapa y centrarla sobre el sanitario.

FASE N.4

Tighten the screw with a screwdriver and an equipment wrench. Then remove the seat-cover from the fixings.
Apretar el tornillo con el destornillador y después con la llave incluida en el kit de fijación.
Después retirar la tapa de la fijación.

FASE N.5

Insert the covering stud on the fixings.
Colocar la cubierta cromada sobre la fijación.

FASE N.6

Insert the seat-cover on the fixing pins and place the hinge plate onto the pins (see above picture). In this way the hinges have been locked into place and can't release.
Insertar la tapa sobre el pivote y desplazar la placa que se encuentra en la bisagra sobre el pivote (ver imagen arriba). De este modo la bisagra ha sido bloqueada y no podrá desengancharse.

FASE N.7

Seat-cover has now been correctly installed.
Tapa instalada correctamente.
